

**NOTE TO MAP USERS**  
These maps are designed and published as a planning and management tool. They are prepared from the best available information. The ownership status is that shown on the land records within one year or less prior to the year shown on the map. Some of the lands (surface and mineral rights) acquired by Federal agencies may be still shown as patented (White) on the map, due to lack of information about such acquisition available to BLM. Because of map scale some features such as roads are approximations and it is not possible to show ownership status of all small tracts below 10 acres. Ownership status and road condition are dynamic factors and change with the passage of time. The user is cautioned against the use of the ownership information shown on the map of a specific tract of land for anything except casual use to give a general land pattern. The official land records in appropriate offices of the Bureau of Land Management should be checked for accurate and up-to-date status on any specific tract of land. BLM would appreciate your submitting information on any errors, corrections or inaccuracies on the map to the respective Bureau of Land Management Office from which the maps were obtained.

**MINERALS OWNED BY THE FEDERAL GOVERNMENT**

Symbol	Mineral Rights
[Hatched pattern]	All Minerals
[Hatched pattern]	Coal Only
[Hatched pattern]	Oil and Gas Only
[Hatched pattern]	Oil, Gas, and Coal Only
[Hatched pattern]	Other
[White box]	No symbol indicates no Federal minerals.

**Note:** Acquired and L.U. may include term or fractional interest for mineral shown.

SCALE: 1/2" = 1 MILE
